WARRANTY
3 years

KANLUX LCOB LONG tape allows you to create long, even 20-meter-long, uniform light lines, without any visible loss of brightness at the ends.

✓ Quick installation, without complex connections, LCOBLs are perfect for long-line lighting projects, thanks to their optimized 24V power supply and special stabilization circuit.

✓ 3-year warranty (30,000 hours). This is a durable and reliable product for use in both residential and commercial buildings.

Kanlux

Kanlux LCOB LONG

✓ **480 LED/m** - densely spaced diodes provide an even line of light,

✓ wysoki wskaźnik oddawania barw **Ra90+** perfectly reproduces the colors of the interior,

✓ three color temperatures available **3000K/4000K/6500K** allow you to select LCOBL tape for various spaces and needs.

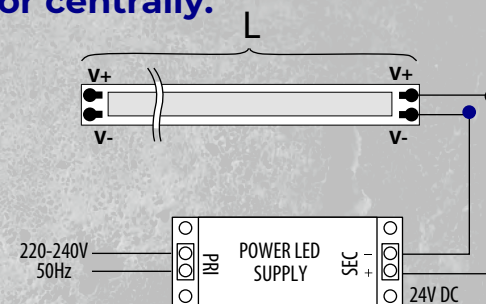

Kanlux

Kanlux LCOB LONG

The special stabilizing system of the LCOBL tapes allows for power supply from both sides or at a single point in the center, simplifying the design and implementation of the installation.

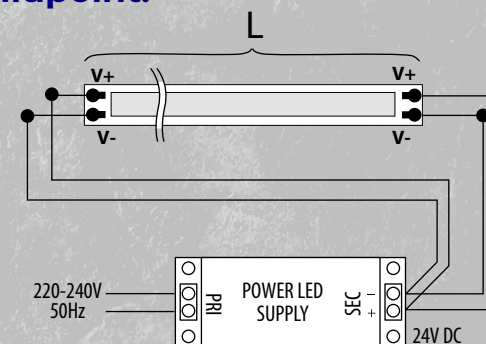

- 1) With lengths up to **18 m**, LCOBL tapes can be fed from one side or centrally.

$5\text{cm} \leq L \leq 18\text{m}$! min 24V DC

- 2) With maximum sections of **20 m**, on both sides or at the midpoint.

$18\text{m} \leq L \leq 20\text{m}$! min 24V DC

IMPORTANT

If the supply voltage at the beginning of the strip is less than 23.5V, provide 24V at the point of connection to the LED strip or power the strip according to the diagram above.
