Kanlux HIMA LED downlights are luminaires with high luminous efficiency (over 110 lm/W). The possibility of adjusting the luminaires in two axes and high colour rendering index make the luminaires ideal for places where it is important to expose specific zones and colours - boutiques, sales stands or large-format stores. Kanlux HIMA LED is a high power luminaire, so it will provide the right amount of light even in high rooms. The reliability of these lamps is confirmed by a 5-year warranty.

- Enclosure material: aluminum alloy
- Lampshade material: glass
