APRILA DTL-W	26739	max 35	matte white	in one axis	20

Kanlux APRILA is a family of white decorative rings made of aluminium. Kanlux APRILA has a streamlined shape and can be adjusted in terms of the angle of light within the range of 20 degrees. The JDR or MR-16 frame can be used for the holders, which will allow us to use light sources adapted to a prepared installation.

- Decorative ring without a ceramic frame
- Enclosure material: aluminum alloy
