A decorative version of a bulb in the shape of a candle. Kanlux XLED C35T in this exceptional version will help you create a very cosy atmosphere. All thanks to a very warm colour of the light and an amber glass in which a spiral LED filament is enclosed. This bulb will look beautiful in table lamps, floor lamps or hanging lamps with an open lampshade. It will be a true decoration of our house, café table or a restaurant's chandelier, as well as suspension lamps without lampshades. It is an exceptional combination of a decorative nature, vintage style and modern energy-efficient LED technology.

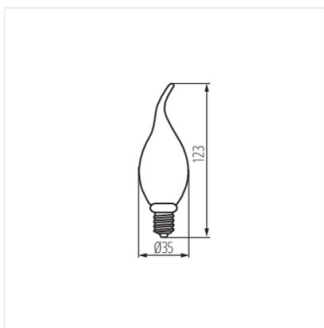

- Lampshade material: glass
