PEVO EL 25 GR	36552	max 11	LED	GX53	wall mounted	graphite

Kanlux PEVO is outdoor lighting with a stable and solid construction. Those luminaires are ideal for gardens with low vegetation. They were designed for walking areas, alleys and green areas next to apartment buildings. Both the posts and the wall-mounted Kanlux PEVO luminaires give an interesting, unobtrusive lighting effect. The luminaires are adapted to replaceable light sources with a GX53 base, thanks to their use, the luminaire gains a unique character and looks like an integrated source.

- Enclosure material: aluminum alloy
- Lampshade material: PC
