Kanlux MERGE-WT

MARGE - WT is an IR motion sensor that combines precision, functionality and resistance. It's an ideal solution for smart light control in a compact form. A 360° horizontal detection angle and a maximum detection range of 8 meters ensures effective movement detection in every zone. You can adjust the lighting duration and the light intensity level at which the sensor operates. The sensor's advantage is its high IP65 rating, which allows to application both indoors and outdoors, even in difficult conditions.
