## Kanlux FIZU LED

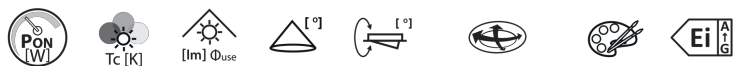

Kanlux FIZU LED downlight accent luminaires are modern built-in solutions. They are available in two versions: an integrated fixed luminaire with IP44/20 and an integrated adjustable luminaire with IP20. Both versions are available in black and white with a matte finish. The housing made of polyamide ensures the durability of the luminaires, and the internal aluminum radiator, which dissipates heat, translates into safety of use. The quick connector ensures trouble-free installation. The adjustable version with IP20 offers a 30° tilt angle and is available in two light colors: neutral and warm. The IP44/20 luminaire, available with a neutral light color, will work well in places with increased humidity such as laundries, drying rooms, and is also an ideal luminaire for the bathroom.
