KANLUX FIZU PRO

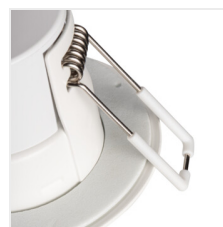

Kanlux FIZU PRO is a downlight fitting that combines a simple design with high resistance to moisture and dust, thanks to its IP65 rating. The CCT colour temperature adjustment (3000K / 4000K / 6500K), controlled via a DIP switch, allows the lighting to be adapted to different interior environments. A metal housing, additional EVA foam sealing, a quick connector, and availability in matte white and matte black make the fitting practical to install and convenient for everyday use. The range is available in matte white and matte black finishes, and is covered by a 5-year warranty.
