Kanlux BLINGO AIO SR

BLINGO AIO panels are a universal all-in-one solution that allows you to replace multiple LED panel variants with a single product, optimizing storage and enabling the use of the same model for different lighting power and color temperature preferences. Users can independently adjust both the color temperature (3000K, 4000K, 6500K) and the luminaire's power (32W/36W/40W) using switches, depending on the version. The panels are available in two sizes (60x60 cm and 120x30 cm), and the surface-mounted version comes with an integrated power supply. A color rendering index (CRI) of >90 and a luminous efficacy of up to 123 lm/W guarantee high-quality lighting parameters, while the versions with a microprismatic diffuser offer low glare (UGR>19). The panels are characterized by easy and quick installation (quick connectors are used), high durability (up to 50,000 hours) and are covered by a 5-year warranty.

- 5 years Warranty under the terms of the warranty statement, available on our website
- Panel/frame material: iron
