Kanlux STONO TRK

Kanlux STONO TRK is a new take on the iconic garden spheres, presented in a warm terracotta colour that gives arrangements a very natural and decorative character. The stone-effect illuminated spheres, available in diameters of 20, 30, 40 and 50 cm, blend perfectly with plants, gravel, and wooden garden architecture. Each luminaire is equipped with a spike for stable installation in the ground, and the use of a replaceable light source allows the lighting output to be tailored to individual needs. STONO TERAOKOTA combines functional lighting with a distinctive decorative element in one.
