Kanlux LEGINO

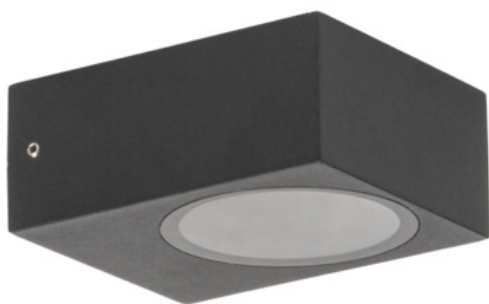

Kanlux LEGINO is a range of outdoor luminaires comprising a wall light and garden bollards in heights of 50 cm and 80 cm, allowing for a cohesive lighting design for façades and the surrounding space. The simple, geometric form blends harmoniously with modern architecture, highlighting entrance areas, pathways, and driveways. The robust aluminium and glass construction, combined with a high IP65 rating, ensures durability and resistance to weather conditions. The luminaires are designed for a replaceable GX53 light source, enabling the lighting parameters to be tailored to individual needs.

- Protective glass material: glass
