

Kanlux

Kanlux PARENO

Kanlux PARENO is a solar garden luminaire with a motion sensor, providing powerful light without the need for connection to the electrical installation, making it independent of wiring while eliminating electricity costs associated with its use. It offers a luminous flux of up to 2800 lumens and a choice of light colour (3000K / 4000K / 6500K), making it easy to adapt to the surroundings and individual needs. An efficient solar panel, high-capacity battery and motion sensor ensure convenience and safety after dark, while the IP54 rating allows the luminaire to perform well in changing weather conditions.
