

## Kanlux LCOB 10W/M 48V

LCOB 48V LED strips are designed for professional installations requiring long, continuous lines of light. The higher supply voltage effectively reduces voltage drop, resulting in improved performance and fewer power injection points and connections. This makes installation simpler and the overall system more streamlined. These strips are ideal for lighting applications in office spaces, hotels, and modern commercial interiors.

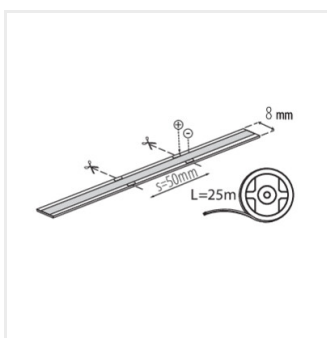

- 3 years Warranty under the terms of the warranty statement, available on our website
