KANLUX BONSA LED CCT

Kanlux BONSA LED 38W CCT is a ceiling light with a decorative form inspired by soft, fabric draping. Its ribbed diffuser gives it a distinctive character while allowing the light to spread softly and create an interesting effect across the interior. With CCT adjustment (3000K / 4000K / 6500K), dimming, a night mode, and remote control operation, it can be easily tailored to everyday needs and the mood of the space. This solution works particularly well in interiors styled in a vintage or English style, while also complementing more contemporary settings where detail and lighting effect play an important role.
