LIGHT
effect

Kanlux SONOR GU10 is a surface-mounted luminaire with an additional LED strip. Thanks to two independent light sources, this lamp can shine in three different ways. With only the LED strip shining (ceiling effect, ideal as evening light), only the bulb in the luminaire shining (thanks to the plastic lampshade, the luminaire looks like an integrated one), while the third variant is to light both light sources simultaneously and make full use of its possibilities. For best effect, we recommend the use of light bulbs with a colour temperature of 3000 K. For Kanlux SONOR lamps, we recommend the use of a two-group (double) switch in order to take full advantage of the possibilities of lighting these lamps.
