The Kanlux XLED W glass bulbs have a classic shape and style while incorporating a discreet white filament, which is a novelty. What you gain is the energy efficiency of LEDs but the yellow filaments have been replaced with white ones. The minimalist XLED W looks remarkably decorative in both on and off mode. The unique white filament produces a warm colour temperature of 2700K. Kanlux XLED W comes in popular shapes: traditional, ball, candle and ST64.
